Why Performance Marketing Works

CAC

Customer Acquisition Cost is the number that decides if growth is profitable or borrowed. We optimize it every week.

ROAS

Return on Ad Spend tells us which creative and audiences deserve more budget — and which get cut.

LTV

Lifetime Value reframes acquisition cost as an investment, not an expense, once retention is built in.

Funnel

A structured funnel turns cold strangers into repeat customers, instead of leaking them at every stage.

Creative Testing

Continuous testing finds the hooks that convert before the market moves on — and keeps finding them.
